BOARD MEETING DATE: February 9, 2023

ITEM TITLE: Consider Approving the Proposed FY 2022-2023 Budget Adjustments

RECOMMENDATION:

That the Board approve the Fiscal Year 2022 - 2023 budget adjustments (attachment 1).

FISCAL IMPLICATIONS:

Financial impacts are fully described in this staff report.

BACKGROUND:

An important part of managing the District's budget performance is through the presentation of a Mid-Year Budget Review which includes a Financial Forecast. A Mid-Year Budget Review allows the District to determine if adjustments to revenue projections need to be completed, and planned expenditures should be modified to maintain structural balance. Management of the District's Budget Performance is an on-going process throughout the year.

Staff reviews all line items and compares actual results against budgeted expectations on a monthly basis. At the mid-point of the fiscal year, staff conducts a detailed analysis to determine if the original budget is still viable, or if adjustments will be necessary. At December 31st, the expectation is that most budget categories will be at 50%, although this may fluctuate based on timing of certain receipts and expenditures. Explanations for revenue and expenditure adjustments are included in the respective line items of the FY2022-23 Revised Budget (attachment 2).

After reviewing the District's preliminary audited financial results from 2021-22 and analyzing the current fiscal year-to-date revenue and expenditure trends, staff applied their best and most prudent professional judgment to confirm the revenue and expenditure projections for the rest of the fiscal year. The following highlights the significant changes that have been made to the original General revenue and expenditure projections compared to the adopted 2022-23 budget:

1. Property Tax – The real estate market continues to remain relatively strong resulting in an increase of \$30,000 over projected revenue.
2. Energy Service Contract – The payment installment on the Energy Service Contract is a new budget line item. This pays for the energy efficient measures the District has adopted (e.g. solar panels, HVAC energy efficient controllers, light timers, etc.).

Respectfully submitted,

Doug Long, General Manager
